REDUCES DELIVERY TIME

REDUCES PICKING TIME

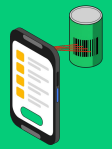

PICK AND PACK ONLINE ORDERS 33% FASTER

The Quest app optimizes the picking experience from the moment you accept a new order all the way to dispatch. All from one easy-to-use mobile platform.

UNIFIED WORKFLOWS

Orders coming from any third-party delivery platforms are stacked up according to complexity and to real-time pickup estimates.

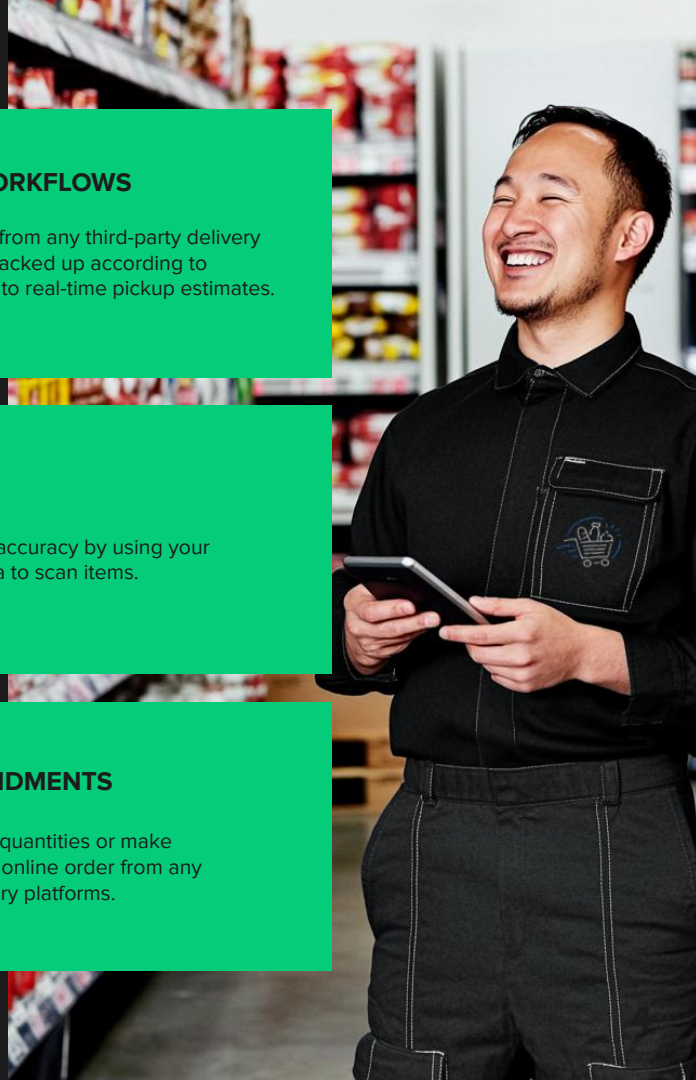

SCANNING

Increase order accuracy by using your device's camera to scan items.

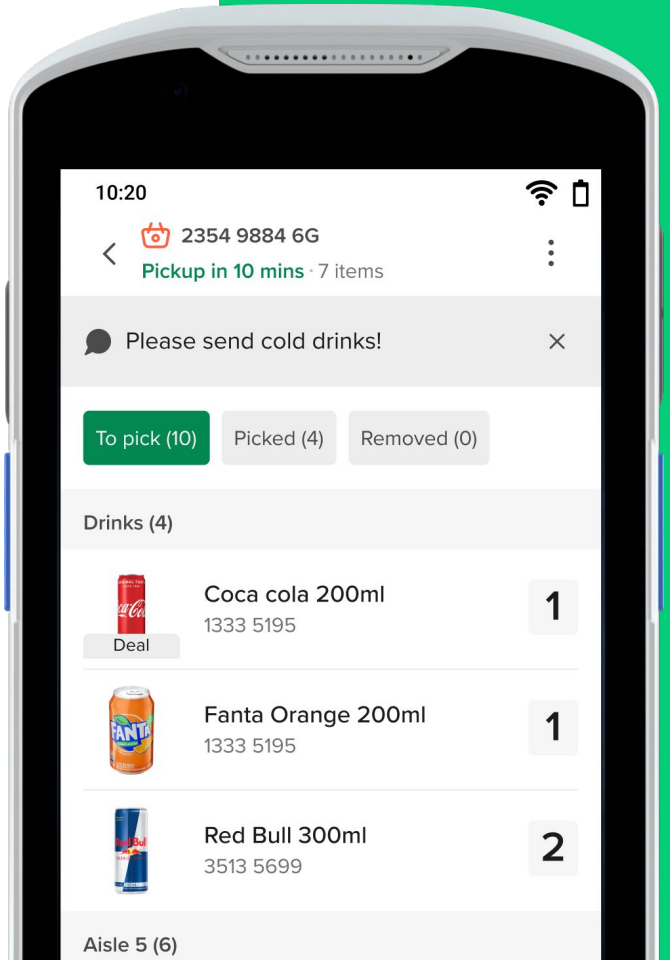

1-TAP AMENDMENTS

Quickly amend quantities or make substitutions to online order from any 3rd-party delivery platforms.

USING THE APP

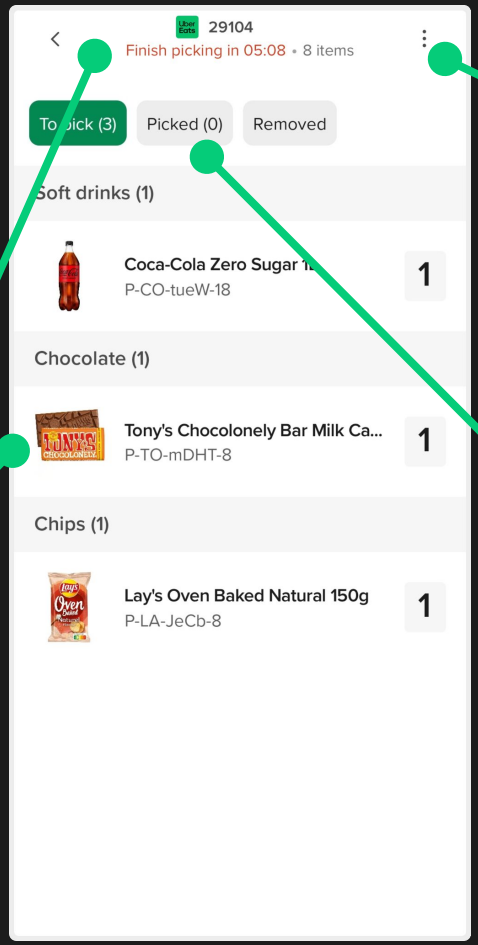

deliverect retail

USING THE APP

PICK AN ORDER

Here's an overview of the interface when picking an order.

Channel, order ID, pickup time, and total items

Items to pick

View order details and customer information

View items by status

Orders to be picked that day are shown. Contact our team to instead use a 24-hour rolling window centered on the current time (12 hours in the past to 12 hours in the future).

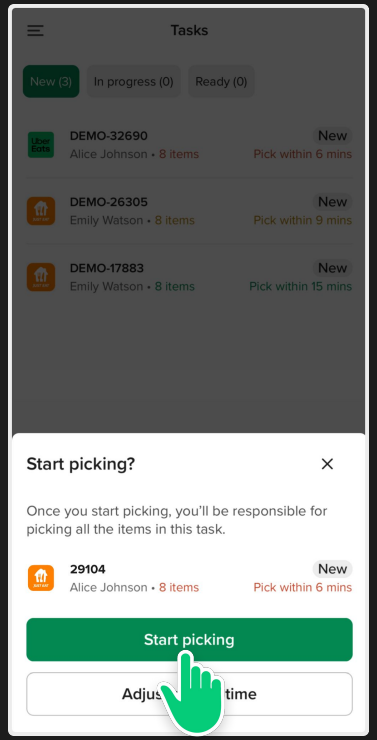

deliverect retail

USING THE APP

PICK AN ORDER

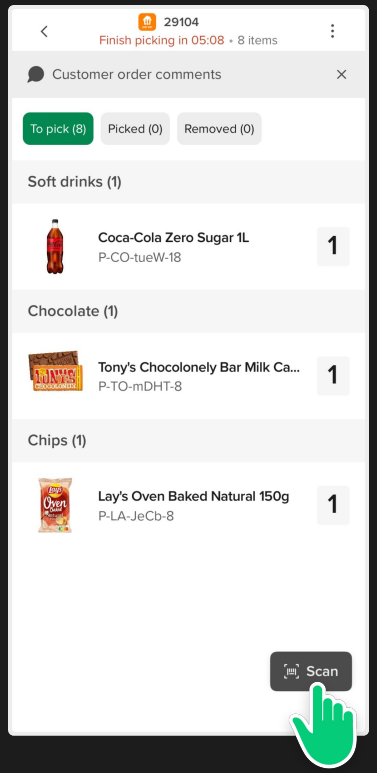

You can pick items by scanning, tapping or swiping.

Start picking

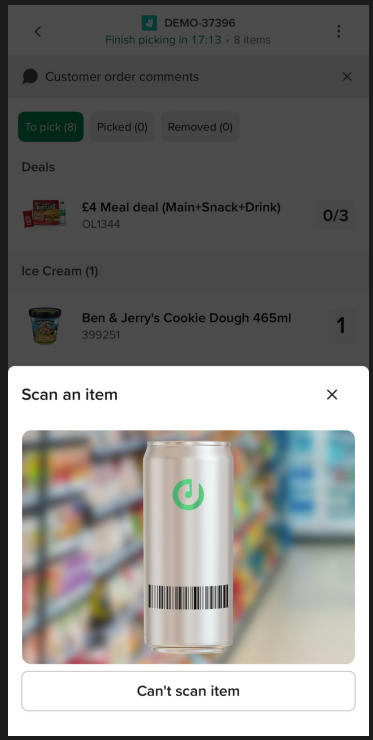

Tap on the order and then on **Start picking**. If necessary, you can adjust the pickup time.

Scanning items

Tap on **Scan**.

Scan the item using the device's camera.

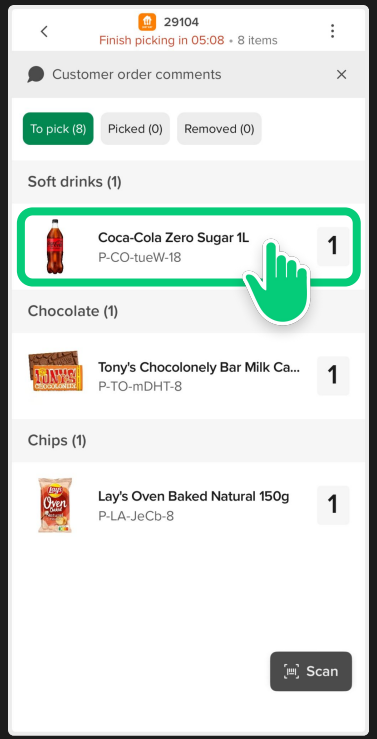

deliverect retail

USING THE APP

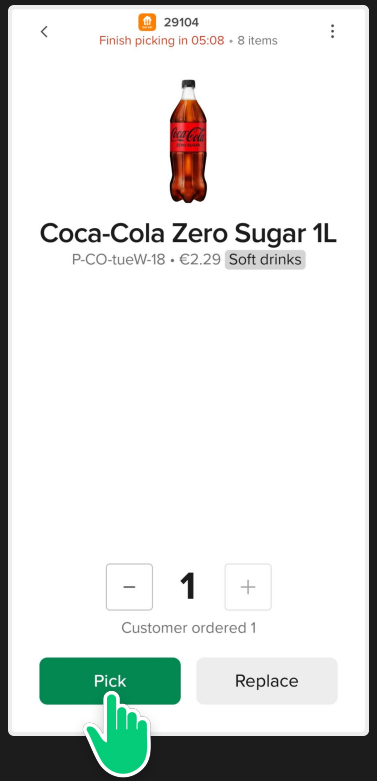

PICK AN ORDER

You can pick items by scanning, tapping or swiping.

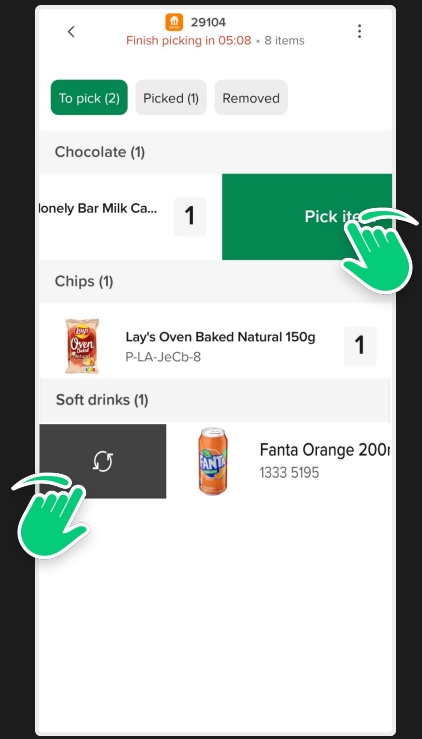

Tapping and swiping items

You can also **tap** on items once you find them in the store.

Confirm by tapping on **Pick**.

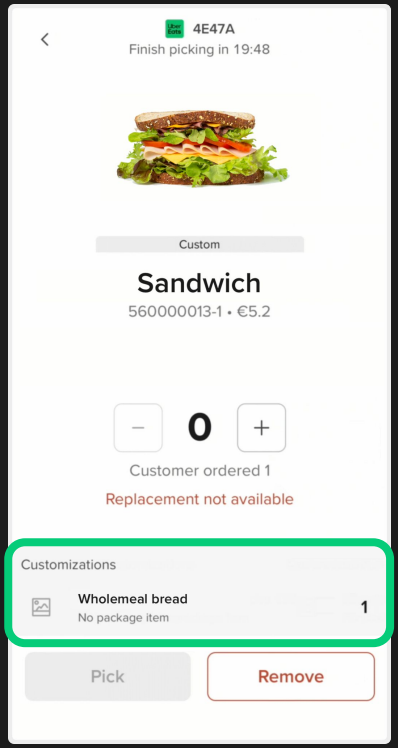

Swiping left on an item also marks it as picked.
Swiping right on an item allows you to replace it.

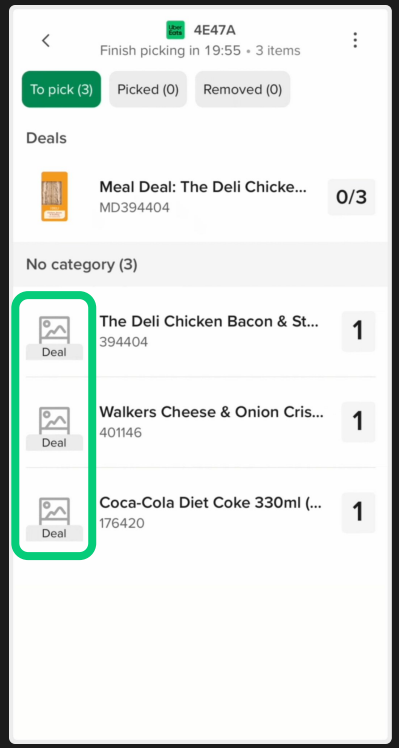

USING THE APP

PICK AN ORDER

Quest allows users to pick products of different types (standalone products, deals, modifiers, and mixed tasks).

The **Customizations** section shows that this item needs to be prepared a specific way.

Items part of a deal require picking individually to ensure that they aren't forgotten.

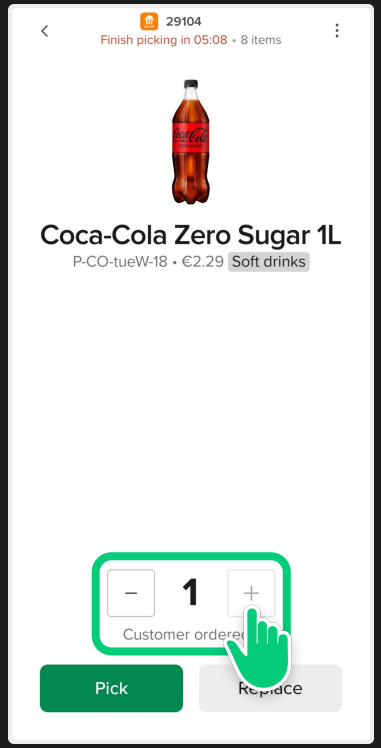

deliverect retail

USING THE APP

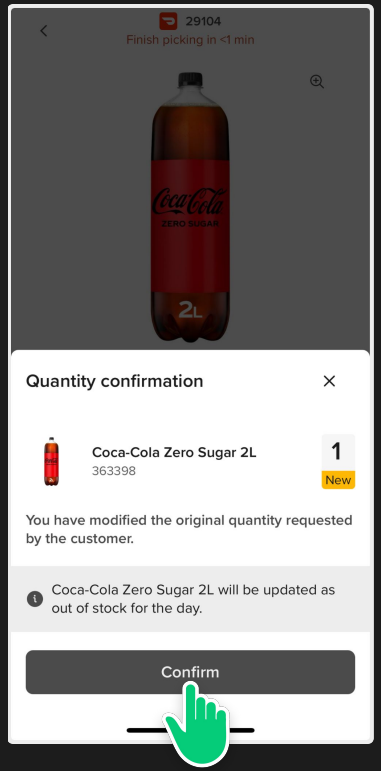

ADJUST QUANTITY

Reduce the quantity of a requested item if there isn't enough stock in the store.

> The item is marked as out of stock for the rest of the day.

Use the **-** and **+** buttons to change the quantity.

Tap on **Confirm**. The item is marked as out of stock for the rest of the day.

deliverect retail

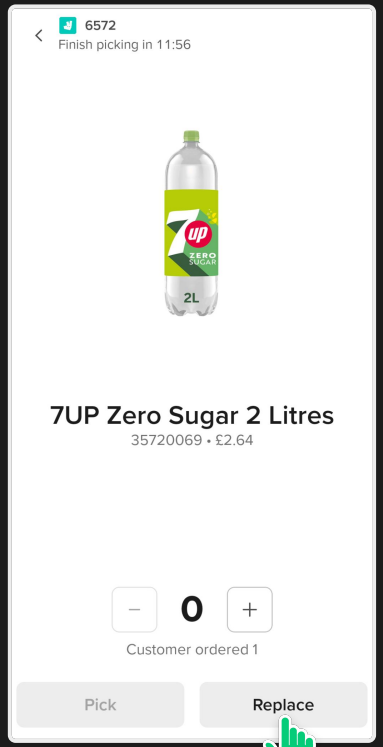

USING THE APP

REPLACE AN ITEM (1/4)

Customer lets you choose the replacement.

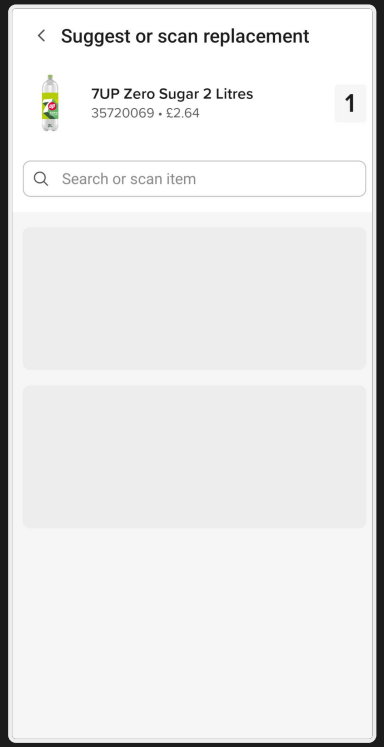

The initial item is marked as out of stock for the rest of the day.

Auto-suggestions only available on Uber Eats deliveroo

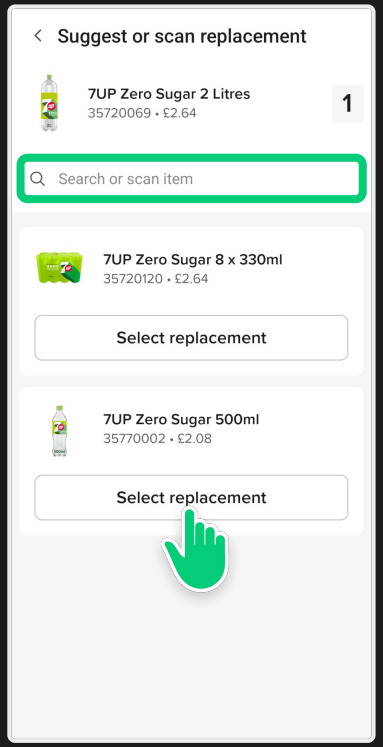

Tap on the item in the order and then on **Replace**.

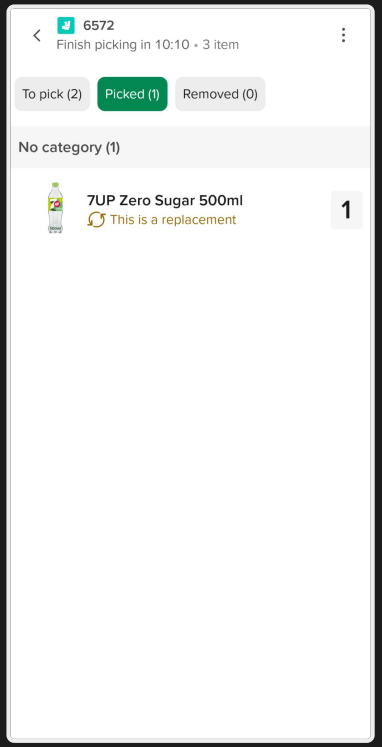

If the button says Remove
It means the customer didn't leave you the option to replace the item.

Some channels will automatically recommend a substitution, **wait 1-2s until they appear.**

If you are not satisfied with the auto-recommended items or nothing appears, you can **type the SKU, Barcode or name of the replacement item.**
You can also **scan** the item.

After picking, the replacement shows up in the **Picked** section.

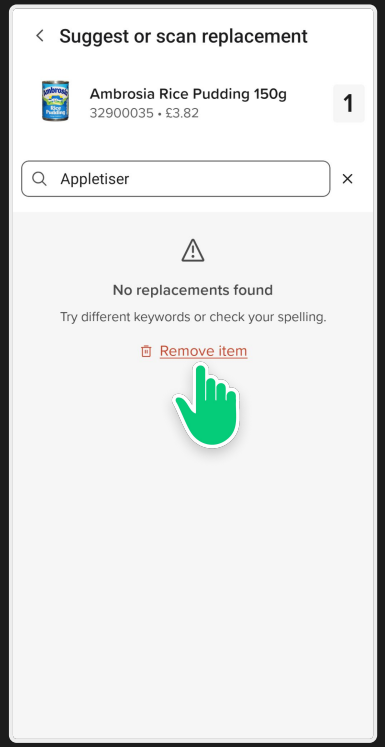

deliverect retail

USING THE APP

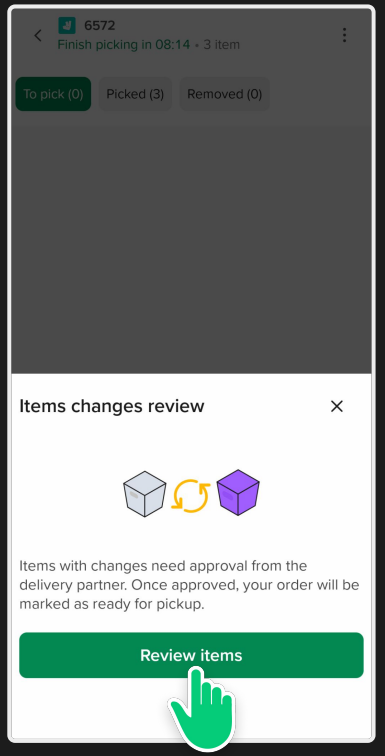

REPLACE AN ITEM (2/4)

Customer lets you choose the replacement.

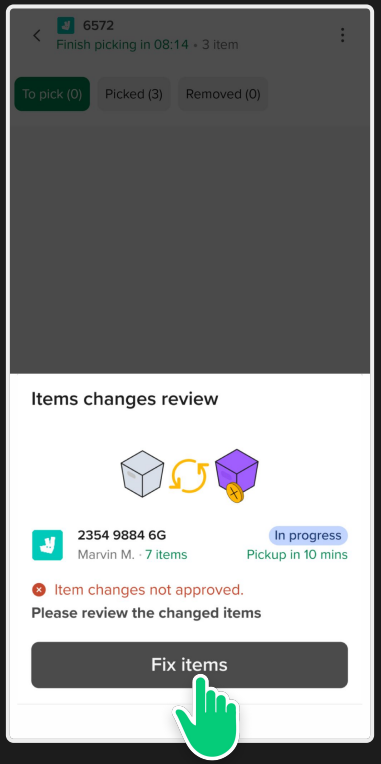

The initial item is marked as out of stock for the rest of the day.

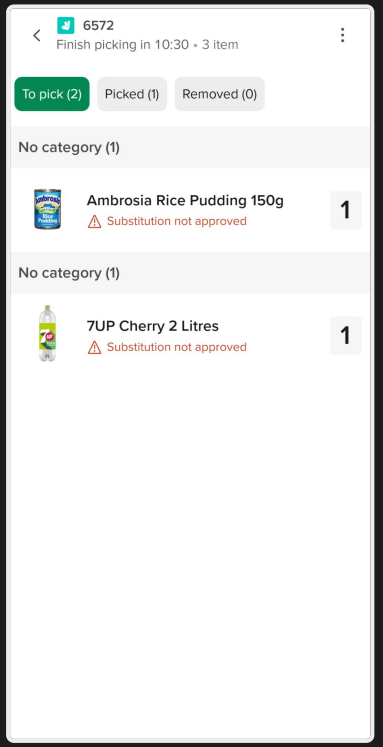

If you cannot find a replacement by searching, you can **Remove it**.

After replacing items in an order, some channels will need to verify the substitutions. Tap **Review items.**

If the items review fails, you are asked to fix the problematic items.

You are taken back to the main section where you can amend / remove items or try another substitution.

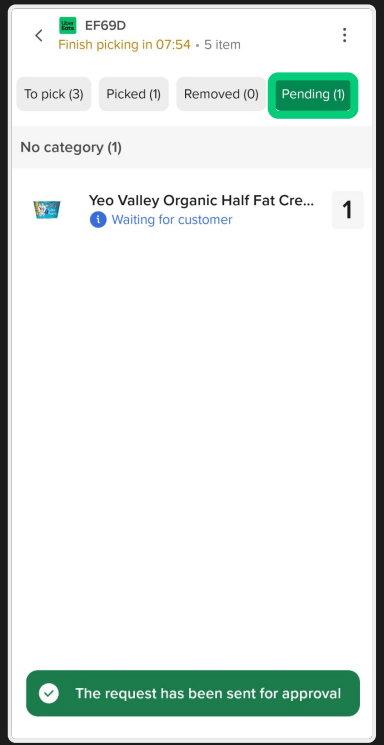

deliverect retail

Only available on orders from: Uber Eats

USING THE APP

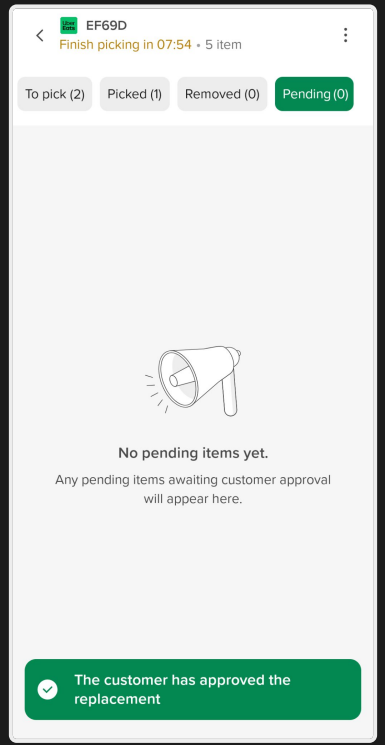

REPLACE AN ITEM (3/4)

Customer can send **live feedback** about substitutions.

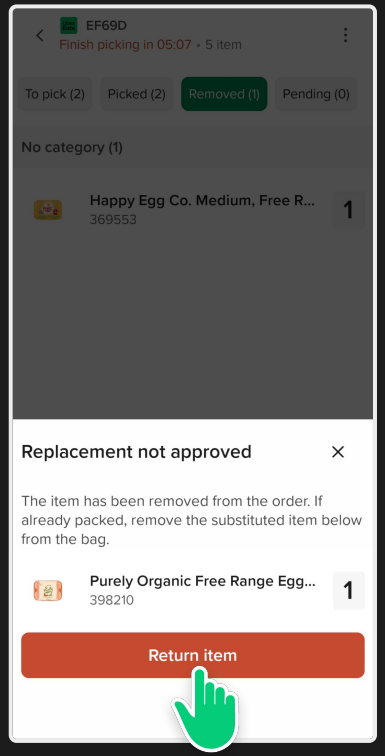

On Uber Eats orders, you will see the substitution move to **Pending**.

While you pick, the customer can **Accept / Reject / Suggest** an alternative item.

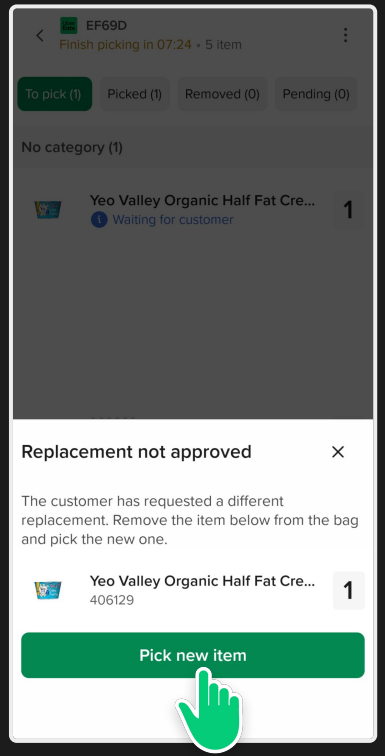

ACCEPT

You get notified that the substitution was accepted. The item moves from **Pending → Picked.**

REJECT

If the Uber Eats customer rejects the substitution, you get notified and are requested to put it back on the shelf. The initial item moves to **Removed**.

ALTERNATIVE ITEM

The customer can also request an alternative item in place of the one you picked as replacement.
You are prompted to pick it and the new item moves to **Picked**.

deliverect retail

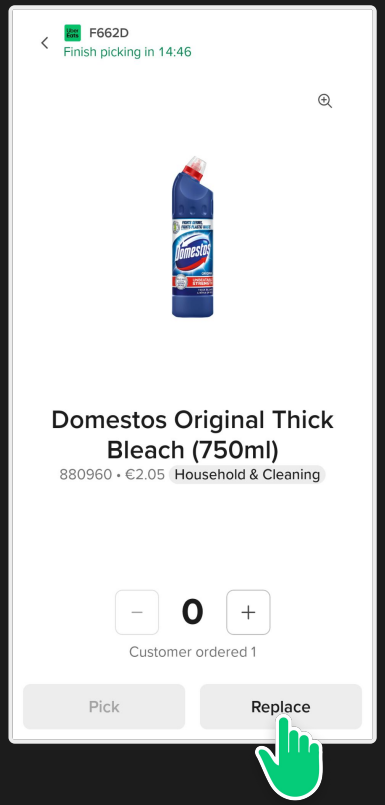

Only available on orders from: Uber Eats

USING THE APP

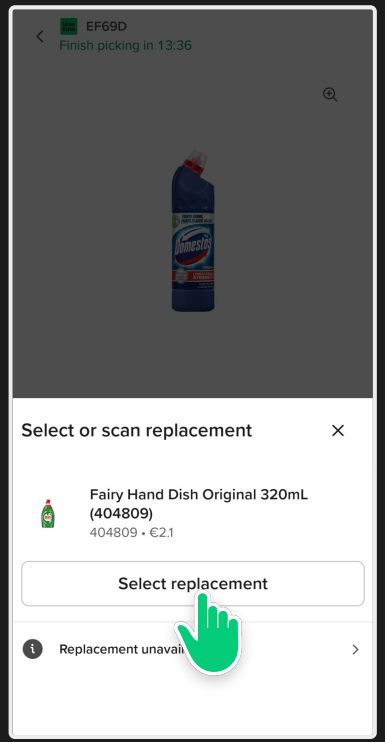

REPLACE AN ITEM (4/4)

Customer pre-selected a replacement

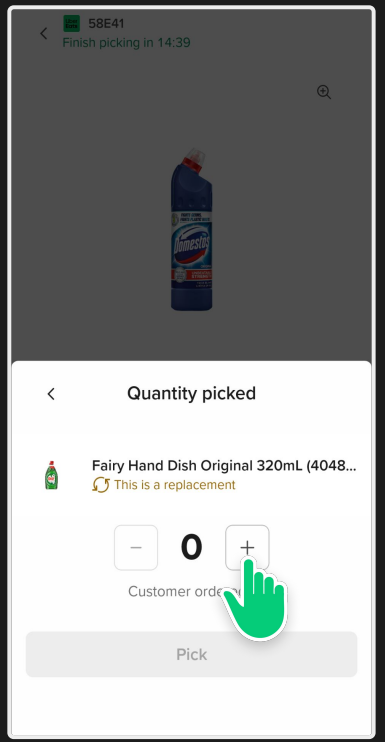

The initial item is marked as out of stock for the rest of the day.

Tap on the item in the order and then on **Replace**.

You can either select the pre-selected replacement or remove the item from the order.

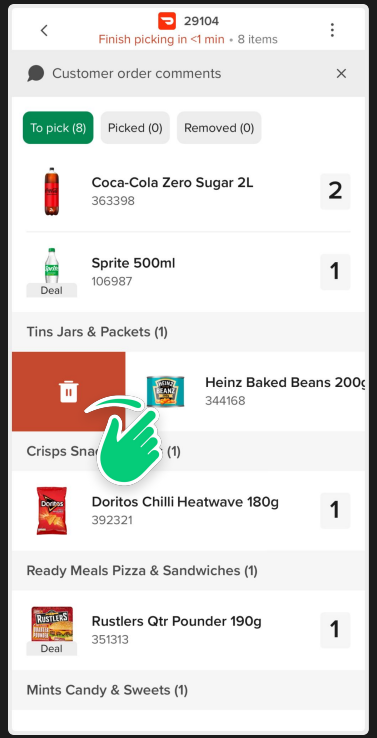

If available, pick the replacement the customer pre-selected.

USING THE APP

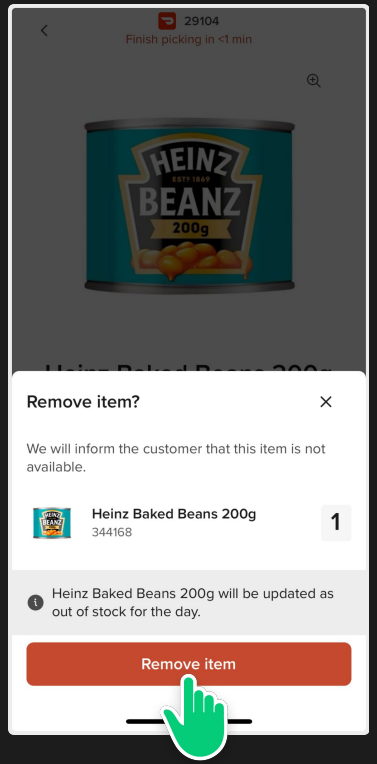

REMOVE AN ITEM

You can remove an item from an order if you are unable to pick it **and the customer has requested a refund instead of a replacement.**

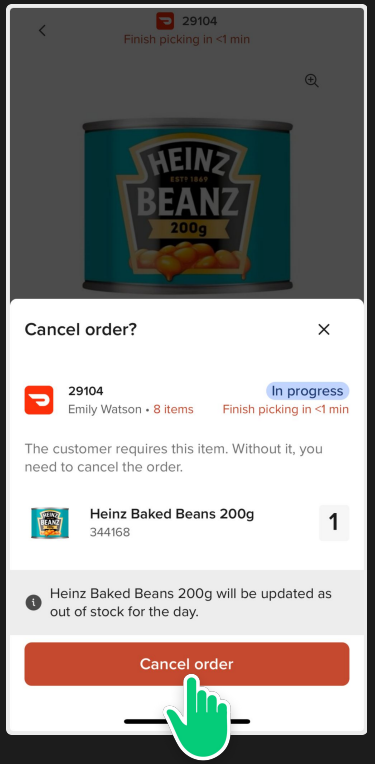

> The item is marked as out of stock for the rest of the day.

Swipe the item to the right.

Tap on **Remove item**.

There is a prompt to cancel the order if the item is required by the customer.

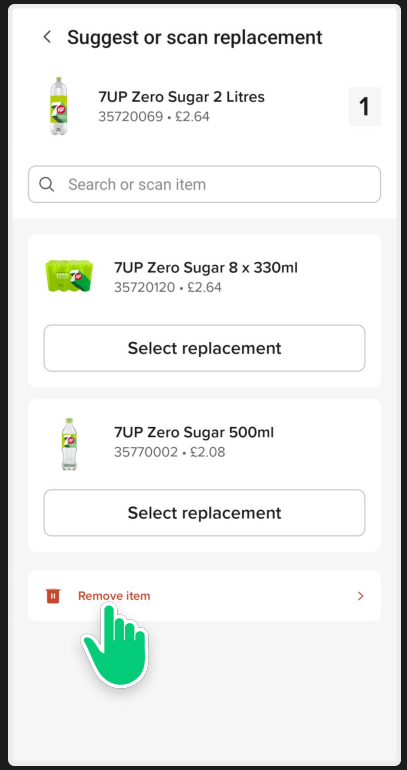

deliverect retail

USING THE APP

REMOVE AN ITEM

You can also remove an item even if a suitable replacement is available.

> Contact us to activate this ability on your account (available version 7.37).

Tap on **Remove item** below the suggested replacements.

deliverect retail

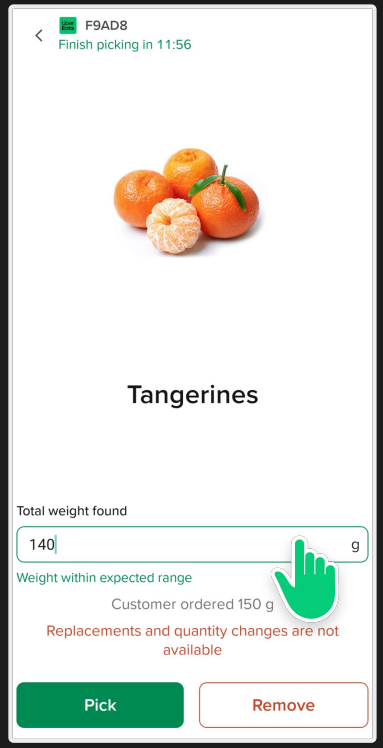

Only available on orders from: Uber Eats Wolt

USING THE APP

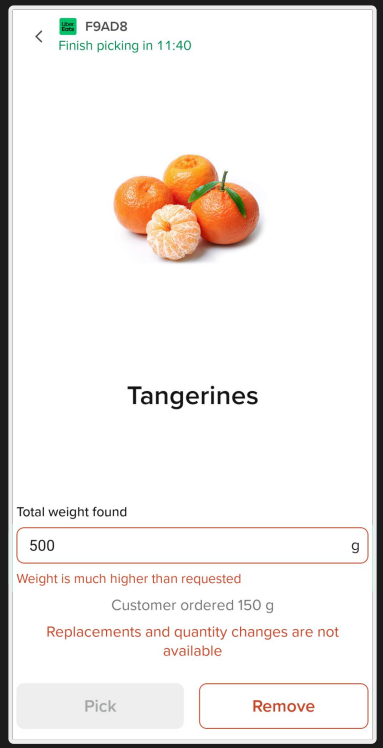

PICKING BY WEIGHT

Items sold by weight

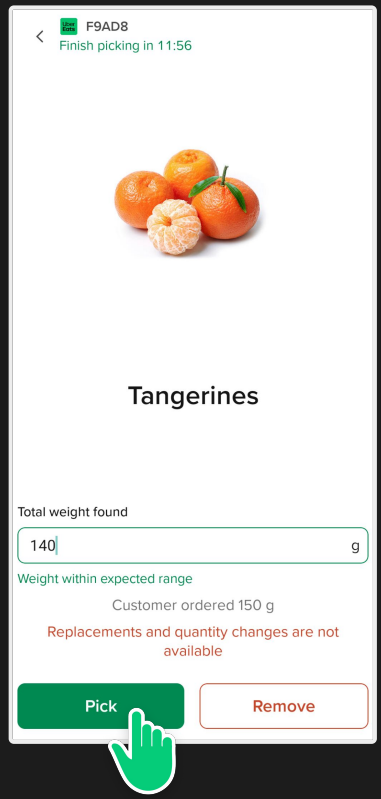

Items may require weighing before being picked.

Enter the total weight of the items into the field

A warning shows if you have entered a weight too high or low.

Tap on **Pick** once you have entered a weight within the expected range and the total count of items found.

deliverect retail

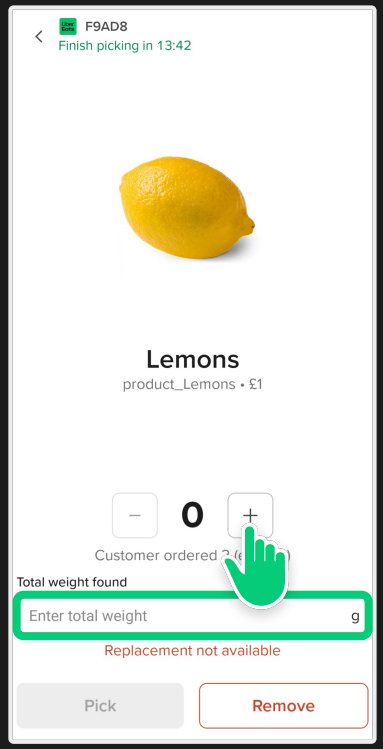

Only available on orders from: Uber Eats

USING THE APP

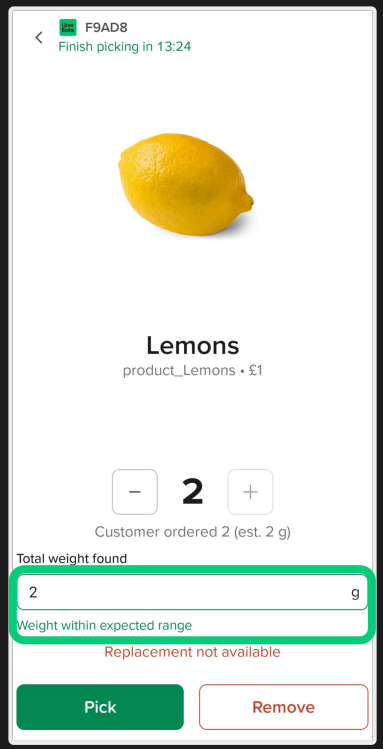

PICKING BY WEIGHT

Items sold by count

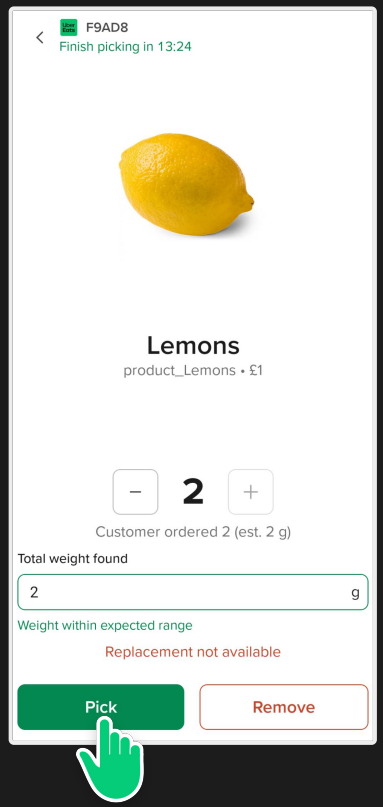

Items sold by unit may require weighing before being picked.

Select the quantity and total weight of the items into the field

A message shows if you have entered a weight too high/too low.- or if you're within the expected range.

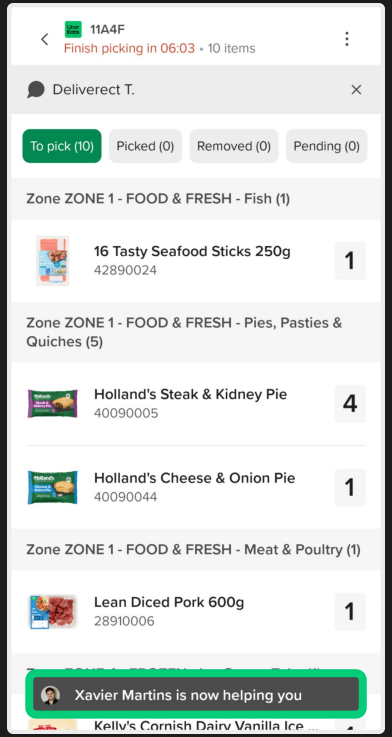

Tap on **Pick** once you have entered a weight within the expected range and the total count of items found.

USING THE APP

COLLABORATIVE PICKING

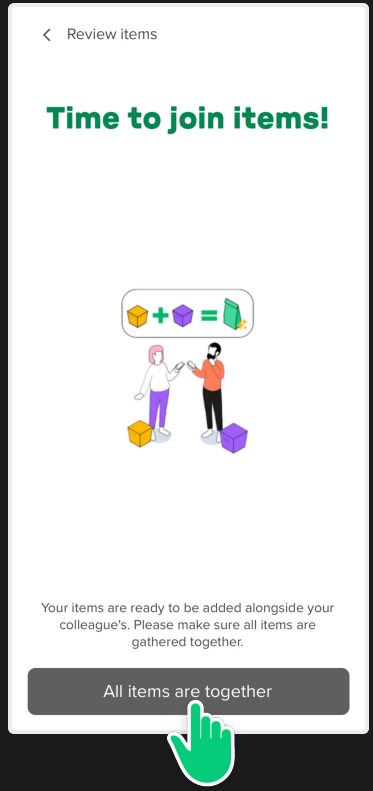

Multiple people can pick the same order.

As the main picker, you're informed that a colleague has joined the order.

As the colleague joining, you're informed that someone is already picking the order.

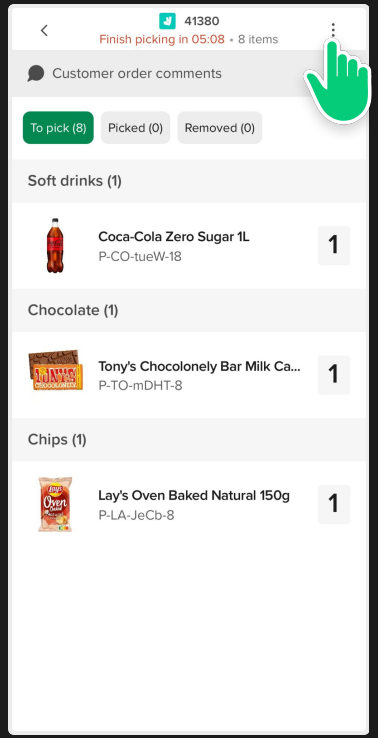

At the end of picking, you're reminded to gather all the order items.
